The current version, v1.6d improves upon v1.6c by splitting the image parameters by continent, reducing file sizes.

v1.6c is the same as v1.6, except that the image mode parameters have been updated to reflect the changes made to the classic mode parameters (e.g. `r0` and `rmin` are different, and `albedo`, `fcanopy`, and `LAI` are calculated

Datasets for each group

The screenshot shows a OneDrive web interface for a user at the University at Buffalo. The breadcrumb path is 'My files > GLY606 > final_project > 03010820 > met_forcing'. The folder contains five files, all named 'ERA5.03010820.YYYY.nc' for years 1990, 1991, 1992, 1993, and 1994. All files were modified 3 hours ago by Yifan Cheng and are 4.02 MB to 4.07 MB in size. Each file has a 'Share' link in the 'Sharing' column.

Name	Modified	Modified By	File size	Sharing
ERA5.03010820.1990.nc	3 hours ago	Yifan Cheng	4.04 MB	Share
ERA5.03010820.1991.nc	3 hours ago	Yifan Cheng	4.02 MB	Share
ERA5.03010820.1992.nc	3 hours ago	Yifan Cheng	4.07 MB	Share
