

Paper discussion

“The FAIR Guiding Principles for scientific data management and
stewardship”

Announcement

- One group (Raheeb, Riley, & Will) will do final presentation on Wednesday (Dec 4th, 2024)

Why are FAIR principles
important?

Are these examples following FAIR principles well?

Reconstructed streamflow for Indian sub-continental river basins, 1951-2021
(<https://zenodo.org/records/8004633>)

high-resolution, daily hindcast (1990-2021) data of Alaskan river discharge and temperature (<https://zenodo.org/records/8320319>)

Are these examples following FAIR principles? Why?

Quantifying Process Connectivity With Transfer Entropy in Hydrologic Models

<https://agupubs.onlinelibrary.wiley.com/doi/full/10.1029/2018WR024555>

On the Precipitation-Induced Uncertainties in Process-Based Hydrological Modeling in the Mekong River Basin

<https://agupubs.onlinelibrary.wiley.com/doi/full/10.1029/2021WR030828>

Group discussion: Differences between platforms

Zenodo: <https://zenodo.org/records/8320319>

Hydroshare:

Group discussion: Publish your model results

Where would you publish it?

What information would you provide?

Different types of publications?

This article is a comment type article
